Figure 3. Location map for Dover 35 Field area. The 4 wells in the field are shown inside the green outline. The Salling-Hansen #4-35 is the current CO2 injector well and the Pomerezynski #5-35 and Salling-Hanson #1-35 wells are the current producers in the demonstration project. Data posted around the well spots is operator, well name, well number, year drilled, K.B., permit number, total depth, top Niagaran Brown measured and subsea depths, and top Niagaran Gray measured depth; small well spots are shallow Antrim wells. Section 35 is one square mile. North is towards the top of the map. Orange lines indicate the cross section shown in Figure 5.
